		WIF I He Story William Phillip Fletcher III Patent Examiner, USPTO Group Art Unit 1762				

U.S. Patent and Trademark Office PTOL-303 (Rev. 11-03) Continuation of 2. NOTE:

Claims 21 and 24, as amended, continue to recite subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the invetnor(s), at the time the application was filed, had possession of the claimed invention.

The originally filed disclosure only supports an embodiment in which the porous sintered layer is impregnated and coated wit one and the same resin to form the resin layer (see spec., 6:18-22 and 8:4-8). These claims, as written are open to impregnating with on resin, followed by over-coating with another, different resin. This particular embodiment is not supported by the originally-filed disclosure.

Again, the examiner has carefully considered the originally-filed disclosure in reaching the above conclusion. Should applicant traverse this position, the prosecution history would benefit from an express citation of those page and line number(s) of the specification which applicant contends support(s) the limitations in question.

Continuation of 5. does NOT place the application in condition for allowance because:

Applicant has neither argued that, nor demonstrated how, the limitations questioned in Section 2 above are supported by the originally-filed disclosure.
